Its complicated, but the short answer is yes, Techlaw did a small amount of analytical work on the Gold King Mine incident under TO 2 (Analytical) of the R8 ESAT contract EPW-13-028. At this time R8 does NOT have any plans to task Techaw under the ESAT contract for additional Gold King Mine work.

Also FYI, also Techlaw did a small amount of field sampling under the R8 – R1 crossover task order, EPW-13-021 TO 10. Dan Wall can reply if any future work is expected under that contract.

CBI/Ex. 4

CBI/Ex. 4

There are also some details about the relative geography of the Gold King Mine site & the Upper Animas site that are worth documenting to you.

I will try to pull something together next week to explain all those complexities.

Dave

Do we have any work currently or down the road that is attached to this Gold King Mine incident?

Thanks
